

FloatLayout

```
classDiagram
    class FloatLayout
    class MainLayout["kivy_elements.MainLayout"]
    MainLayout --|> FloatLayout
```

The diagram illustrates a class hierarchy. At the top is the 'FloatLayout' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name 'FloatLayout', while the two sections below are empty. Below 'FloatLayout' is the 'kivy_elements.MainLayout' class, represented by a rectangle divided into three horizontal sections. The top section contains the text 'kivy_elements.MainLayout', the middle section is shaded gray, and the bottom section contains the text '+ __init__()'. A blue arrow with an open triangular head points from the top section of 'MainLayout' to the bottom section of 'FloatLayout', indicating that 'MainLayout' inherits from 'FloatLayout'.

kivy_elements.MainLayout

+ __init__()
